Collection Dates

Waste collection services are provided on national holidays.

Collection dates vary by area.

Please refer to the Household Garbage Collection Calendar that is distributed separately.

The Household Garbage Collection Calendar is available in six other languages (English, Portuguese, Chinese, Spanish, Korean, Thai), in addition to Japanese.

"Nagaizumi Trash Separation App" Setup

① Please install the app by scanning the QR code.

How to Use on Your iPhone

How to Use on Your Android

② Please set your district on the first page.

Please select your district from the 10 collection routes.

Once your district has been set, you will be taken to a page where you can search the waste collection calendar and other resources.

※ Please note: If you are unable to find your area in the Trash Collection Guide and app, please inquire at the Local Administration Division (989-5500).

Terminology Guide

3R	An abbreviation of the three Rs — Reduce, Reuse, Recycle.
Reduce	To use things with care. To buy only what you need, and only as much as you need. To extend the life of your possessions for as long as possible; for example, by repairing them.
Reuse	To use items again if possible. Returnable bottles (empty bottles) are reused.
Recycle	Trash being turned into the raw materials for new products. For example, PET plastic bottles being turned into fleece.
Trash	Items that have been collectively judged to be no longer useful.
General Disposal Items	Non-industrial waste.
Industrial Waste	In addition to the 20 classes of waste generated by industrial activity, industrial waste includes desks and chairs generated in connection with commercial activity, waste from items such as lighting equipment, and construction waste material.
Household Waste	The trash thrown away by a household. Items received from businesses and similar entities cannot be disposed of as household waste, and are disposed of as industrial waste. It is the responsibility of the individual to assign the disposal of waste construction materials as industrial waste to a specialist.
Commercial Waste	Leftover employee food; papers; garden clippings; grass; cafeteria and restaurant kitchen waste and residues; waste textiles, such as hand towels containing at least 50% natural fiber; and more are collected by the municipality for a fee. Depending on the industry, some items may be classed as industrial waste.

How to Sort and Dispose Trash and Recyclables

Disposing

Please place your trash in the designated bags and other containers; fill in the name of your district of residence, your block, and your name; and take your trash to your designated trash collection point by 8 a.m. on collection day.

- * Upkeep of trash collection points is the responsibility of residents of the district in which it is in use.
- * Even if you are a town resident, you cannot use another district's trash collection point that you do not maintain.

Trash Bag Usage

	Semitransparent garbage bags designated by the town or semitransparent bags made of HDPE (high density polyethylene).	Supermarket bags (grocery bags)	Semitransparent or transparent plastic bags
Combustible Garbage	○	×	×
Plastic Garbage	○	○	○
Non-combustible Garbage	○	○	○

* You must not use black or blue plastic bags. * Please take out paper bags and cardboard as recyclables.

For Those Moving In, Moving (Within the Municipality), or Moving Out

- Area residents are responsible for upkeep of trash collection points.
 Can I use this trash collection point? What should I do if I'm not sure?
- ★ If your house is newly built, please inquire with a district official or real estate agency.
 - ★ If you are renting, please inquire with a district official or the building's management company.
- Moving In: Please dispose of items you no longer need at the waste disposal facility of your previous residence.
 Moving Out: Please dispose of items you no longer need at the incinerator or other facility.
 Moving (Within the Municipality): As above.

Bringing Items Directly to the Incinerator

- ★ All items are **received** at the incinerator. Inquiries — Waste Incinerator: 055-986-8393/Department of Living Environment: 055-989-5514
- ★ We request a driving license or similar document as proof of town residency. (We require proof of both address and identity)
- ★ Items are accepted from 8:30 a.m. until noon, and from 1 p.m. until 4:30 p.m. (Bulky refuse and similar items are accepted from 8:30 a.m. until 11:30 a.m., and from 1 p.m. until 4 p.m.)
- ★ Trash may be brought in from Monday to Friday, excluding holidays.
- ★ When bringing in household waste, please separate it as specified on the waste collection calendar and other documents.
- ★ At Reception, you will be requested to take suitable items directly to the recycling depository or landfill site.
- ★ Some commercial waste may be classified as industrial waste and refused.
- ★ Your trash will not be accepted if you have falsified your address or the location where the trash was generated, or are transporting another person's trash without authorization.
- ★ You cannot transport another person's trash without authorization to collect and transport it. You may have the best intentions, but please be careful, as this is a violation of the Waste Disposal Law.
- ★ The Waste Disposal Law carries penalties, with potentially up to five years of imprisonment and a fine of up to ¥10 million in cases like that described above.

The law states that household waste (general disposal items) must be disposed of by the municipality of the area in which the individual is resident. Nagaizumi is covered by Nagaizumi municipal services, and residents of neighboring towns and cities cannot use Nagaizumi municipal services. If your family lives in another district, their trash is disposed of in the town in which they live. Their trash cannot be brought to Nagaizumi.

Subsidy Program for Kitchen Garbage Disposal Equipment

Kitchen garbage makes up approximately 30% of combustible garbage produced by households and businesses. In order to reduce and recycle kitchen garbage, the Town offers subsidies for the purchase of kitchen garbage disposal equipment etc. Kitchen garbage disposal equipment etc. also solve other problems related to trash, such as unpleasant odors, oozes, insects, or lack of space to store trash up to collection dates, and prevents collection points from being disturbed by cats and crows. Take advantage of this subsidy system to make use of our kitchen garbage by composting and contribute to reducing trash.

Overview of Subsidy Program

- Amount** : Up to one half of the purchase price of the equipment, with a maximum of 30,000yen for kitchen garbage disposal machines and 4,000yen for waste composting containers (compost), will be subsidized. Nevertheless, kitchen garbage disposal equipment that produces wastewater does not qualify for the subsidy.
- Eligibility** : Residents of Nagaizumi Town and owners of businesses in Nagaizumi Town, who are capable of utilizing or disposing of composted kitchen waste on their own responsibility.
- Number of Units Covered** : The town will subsidize **1 kitchen garbage disposal machine per family, which is to be used for 6+ years,** and **2 kitchen garbage composting containers (compost) per family, which is to be used for 3+ years.**
- How to Apply** :
 - ① Obtain a receipt for your purchase of equipment.
 - ② The Department of Living Environment provides a grant application (available for download from our homepage). Please apply by filling in payee bank account and other necessary information, stamping with your seal, and attaching your receipt. (Please provide the grant application, grant provision invoice, and a post-installation photograph. Please bring documentation that verifies your bank account information.)
 - ※ Please present a (printed) photograph clearly showing the installation when making your application.
 - ③ Applications must be made within 30 days of the date of purchase or date of payment (whichever is the later date), and by March 10th of the fiscal year in which the purchase was made.
 - ④ Applications are accepted at the **Department of Living Environment, on the third floor of the Town Hall.**

Recycling Cooking Oil

- Oils that can be reused** : Sesame Oil, Olive Oil, Corn Oil, Safflower Oil, and Other Vegetable Oils Liquid at Room Temperature
- Oils that cannot be reused** : Engine Oil, Gear Oil, Other Mineral Based Oils, Lard, Coconut Oil, and Other Cooking Oils Solid at Room Temperature
- How to Drop-off** : Put the oil in a PET bottle, etc. (bottles with lids)
- Business Hours** : Mondays through Fridays (excluding national holidays) from 8:30 to 16:30.
- Bring to** : Waste Incinerator

Disposal of Home Medical Care Waste

As a precaution against worker injury or infection during collection and sorting, the municipality treats waste generated in relation to home medical care (such as needles for insulin, intravenous drips, or other purposes) as non-collection trash (items that must not be taken away). The patient or the patient's family should dispose of their homegenerated medical waste by taking them back to the medical facility where the patient receives treatment. Please make use of the Nagaizumi Usagi Pharmacy (283-1 Minami-Isshiki), who accept needles and similar items free of charge, including items received from other medical institutions.

* See reference list on page 19

1 Combustible Waste 《Twice a Week》

① - ⑤ : Monday, Thursday (A area)
⑥ - ⑩ : Tuesday, Friday (B area)

Topics Burnable waste is burned at the incinerator and the ash is landfilled. By eliminating paper, clothing, as well as leftover food and uncooked products, also called food loss, we can also contribute to the effective use of resources and international cooperation.

Keywords: "reasonable portion size", "food loss reduction", "sustainable development goals".

How to Sort	<ol style="list-style-type: none"> Food waste, fallen leaves, garden clippings from trees and other plants (up to 5 cm in diameter), paper diapers, and other burnable items. Dispose of waste from paper diapers in your lavatory before putting them in the trash. Brush soil from the roots of grass, flowers, moss, and other vegetation before putting it in the trash. Where wooden furniture can be taken apart, disassemble and separate by material. Where possible, remove metal from disassembled wooden furniture and take out as recycling.
How to Dispose	<ol style="list-style-type: none"> Fill in the name of your district, your block, and your name on your town-designated trash bag, and tie the top closed before taking it out. Do not put multiple smaller bags inside your trash bag. Do not wrap small quantities of trash in newspaper. You can take out up to five bags and five bundles of trash at a time. If you have more than this, you must transport it yourself. Cut tree branches, bamboo, cabinets, and other wooden items to a maximum length of 50 cm and tie together with hemp cord, rope, or similar fastening before taking out. (Split bamboo lengthwise if over 3 cm in diameter.) Tree trunks can be a maximum of 5 cm thick. Please split anything thicker lengthwise. Please bag roses and any other thorny branches before taking out. Please label the bag "トゲあり" (thorns). Break items with sharp ends, such as skewers and toothpicks, in two before taking out. If you are unable to take your deep-frying oil for disposal immediately after use, harden it with an oil coagulant or soak it up with paper or a similar material. Animal droppings and pet litter should be carefully separated before taking out. As buildings and the pillars and wall materials used in their construction are treated as industrial waste, you must assign their disposal to a specialist.

Taking Garden Clippings and Waste Board to the Trash Collection Point

Disposal Methods for Waste Wood, Fallen Leaves, and Soil

Garden clippings "bring thick branches (diameter of over 5 cm) direct to facilities."

Please bring thick branches and similar items to the incinerator. Please note that they will only be accepted if all soil has been removed, including from the roots. Garden clippings **must be a maximum of 50 cm in length, even when bringing them to the incinerator.**

Topics It is very common for thick branches to burn only partially. Even at a diameter of 5-10 cm, they may only partially burn, jam in the machine, or, in the worst cases, necessitate an emergency halt of the incineration facility, depending on the species of tree and its branching pattern. We therefore ask for everyone's cooperation when they are throwing away these materials.

Items That Cannot Be Taken to the Trash Collection Point

Items that cannot be disassembled must be brought to facilities by the individual.

(Please assist us in disassembling your item to the best of your ability)

Disposal of Trunks and Similar Items with a Diameter Exceeding 20 cm (Commercial Garden Clippings Generated by Gardeners and Similar Enterprises)

- We accept trunks and similar items with diameters of up to 20 cm.
- Please take trunks and similar items with diameters exceeding 20 cm to a specialist (this service will be charged).
- * Within Nagaizumi, please address inquiries to Seki Transys Corporation.

Soil Treatment and Disposal

- We do not collect soil as it is not a waste product.

Please address inquiries regarding soil and stone for planters and plant pots to Marutama Transportation Co., Ltd. (Sekikengyō Co., Ltd.) (Address: 394-16 Minami-Isshiki; Telephone number: 986-5317)

- ★ Your trash will not be accepted if you have falsified your address or the location where the trash was generated, or are transporting another person's trash without authorization.
- ★ You cannot transport another person's trash without authorization to collect and transport it. You may have the best intentions, but please be careful, as this is a violation of the Waste Disposal Law.
- ★ The Waste Disposal Law carries penalties, with potentially up to five years of imprisonment and a fine of up to ¥10 million in cases like that described above.

2 Plastic Waste 《Every Wednesday in all districts》

(1) Plastic Containers and Packaging

Topics Chemical components are extracted and reused as a heat source for iron manufacturing.

How to Sort	<ol style="list-style-type: none"> Plastic and vinyl items used as containers and packaging for food and other products belong to this category. Plastic bags and wrappers; bottles and cups; tubes and lids; trays and packages; packaging and cushioning material (styrofoam, etc.). Items with the identification mark for plastic containers and packaging.  Items with the plastic symbol, even if manufactured overseas. Aluminum-coated bags for potato chips or vacuum-packed foods; plastic blister packs for pills; tubes for toothpaste, mayonnaise, makeup, etc.; lids and caps. Bags such as plastic shopping bags, candy bags, plastic bags; plastic wrappers for snacks and prepared foods. Bottles for shampoo, detergent, and condiments such as sauce; bento (lunch) trays; cup noodle containers.
How to Dispose	<ol style="list-style-type: none"> Write your ward, section, and name on a town-designated garbage bag and tie at top to close. All plastic containers and packaging, such as bags, trays, cups, and tubes, etc., regardless of type, can be put into one bag. * There are not several bags inside one bag (do not double or triple bag). * Do not take out in small bags. Use bags of at least 10 liters (standard) and larger (to avoid scattering). ③ Thoroughly rinse or wipe container to remove all food particles, etc. ④ Empty and thoroughly rinse containers for mayonnaise, ketchup, etc. and remove the cap. ⑤ Empty tubes for toothpaste, etc. and remove the cap. ⑥ Empty bottles for shampoo, etc., rinse thoroughly, and remove the cap. ⑦ Price stickers and other stickers that cannot be removed may be left on. * Do not put dry cell batteries and rechargeable batteries in bags (throw away in the appropriate category)

Topics Microplastics problem

Start disposing different plastic types appropriately! Stop amassing unwanted plastic bags!

Plastic Waste

Plastic bags and shopping bags; wrapping film and plastic wraps (cling film); bottles; cups and containers; tubes; lids and caps; trays and packages; styrofoam, packaging material, cushioning material, PET bottle caps.

There are not several bags inside one bag (do not double or triple bag).

When Sorting Plastic Waste

① Remove caps from bottles, etc.

*Make sure to **empty** the containers.

② Sort the content and dispose accordingly.

(2) Other Plastic Waste

Topics Use as recycled plastic.

How to Sort	<ol style="list-style-type: none"> Plastic garbage excluding plastic containers and packaging belong to this category. Plastic items used mainly as tools, such as polyethylene buckets, wash basins, garment cases, etc. Metal parts such as screws and nuts should be removed from plastic toys, riding toys, etc. * Items made of both plastic and metal parts that cannot be dismantled should be disposed as landfill waste. Cases for CDs, video tapes, etc. Vinyl and rubber hoses are landfill waste.
How to Dispose	<ol style="list-style-type: none"> Write your ward, section, and name on a town-designated garbage bag and tie at top to close. Small items should be taken out together in the same bag. Use a bag of at least 10 liters where possible. Write your name on clothing containers and similar items and take them out as is. Empty planters, plastic flower pots, etc. of dirt and rinse with water. Remove dust and other soiling with a damp cloth. Rinse and remove the lid from plastic containers that contained kerosene or similar products before taking out. Remove dry cell batteries and rechargeable batteries, isolate (by covering their terminals with electrical tape), and take them out with PET plastic bottles and hazardous waste.

① Sort CDs for Disposal

② Toys *Dismantle if possible and sort by part.

3 Non-combustible Waste 《Alternate weeks, twice a month》

(1) Small Home Appliances

Topics They are stored at our recycling depository before being handed over to treatment contractors. Metal, rare metals, and similar materials are all used as recycled materials.

How to Sort	<ol style="list-style-type: none"> Dispose of all appliances with a power plug, including battery-powered ones, as small appliance waste. Remove dry cell batteries and rechargeable batteries. If the batteries are difficult to remove, dispose of the appliance as is. Insulate the removed batteries by wrapping their electrodes with vinyl tape. Dispose of them as PET bottle waste or hazardous waste. Dispose of microwave ovens and fan heaters as small appliance waste. Make sure to remove kerosene from fan heaters before disposing of them. Directly take major appliances that do not conform to the Home Appliances Recycling Law to the Incineration site. Return items you are using with a lease contract, such as water dispensers, to the company. 	
How to Dispose	<ol style="list-style-type: none"> Separate small appliances, such as calculators, from solid waste as they are stored in different places. Remove any removable oil tanks or plastic caps, and dispose of them separately. 	

(2) Solid Waste

Topics Brought to our landfill site, sorted, disassembled, and shredded, after which they are disposed of as recyclables, burnables, or landfill waste

How to Sort	<ol style="list-style-type: none"> Empty suitcases and golf bags before disposing of them. Empty any pockets. Tie each futon mattress with a rope separately, and do not put any small items inside. Fold rugs and carpets as much as possible before disposing of them. 	
How to Dispose	<ol style="list-style-type: none"> Remove any metal fittings, and disassemble to parts that are less than 50cm if the item's height, width, or length is more than 50cm. Directly take it to the garbage incineration site if it cannot be disassembled. Remove any plastic covers securing the item. Put all small stuffed toys together in a bag before disposing of them. Fold large ones as much as possible before disposing of them. Remove dry cell batteries and rechargeable batteries. 	

(3) Landfill Waste

Topics Brought to our landfill site, sorted, disassembled, and shredded, after which they are disposed of as recyclables, burnables, or landfill waste

How to Sort	<ol style="list-style-type: none"> Request a professional company, such as Marutama Transportation or Kanken Ltd., to dispose of soil and stones. Dispose of heat-resistant glass, such as milky-white colored cosmetics containers and baby bottles, as landfill waste. Dispose of thin aluminum products, such as aluminum foil, as landfill waste. Dispose of tempura guards as recyclable waste since they are thick. Brush soil off plant pots. 	
How to Dispose	<ol style="list-style-type: none"> Put small items in a bag. Fill out the district, group, and full name, and tie the bag before disposing of it. *It is possible to ignore filling out the full name and so on if there is an applicable station management rule. Dispose of glass items, such as fish tanks, without breaking them. Cover sharp broken glass with gum tape, and put it in a bag before disposing of it. Dispose of shoes and boots in a bag, and do not stuff them with garbage. Roll up plastic hoses and gas pipes, and tie them with a rope before disposing of them. 	

4 PET Bottles / Hazardous Waste 《Twice a month》

(1) PET Bottles

Place out at collection station that accept Recyclables

How to Sort	<ol style="list-style-type: none"> Soft drink containers (tea, juice, water); containers for certain condiments (soy sauce, soy sauce products, mirin-type condiments, cooking vinegar, table vinegar, dressing-type condiments); alcoholic beverage containers (shochu, sake, whisky, etc.). This category is limited to items marked with a special "PET1" identification mark. (Treat foreign products as well) Remove caps, plastic labels, and advertising stickers.
How to Dispose	<ol style="list-style-type: none"> Remove caps, plastic labels, and advertising stickers (paper and plastic), and as much of the paper labels on, for example, mirin bottles as possible. Empty of contents and rinse thoroughly. In order to reduce their volume, crush before placing in the collection container. Remove from bags when placing into the collection container.

《Before disposing》

We will lend this to collect PET bottles for district events.

Topics PET bottles are being recycled to fleece, trays and new PET bottles so on.

(2) Hazardous waste (fluorescent tubes, dry cell batteries, disposable lighters, rechargeable batteries)

How to Sort	<ol style="list-style-type: none"> This covers used fluorescent tubes, dry cell batteries, disposable lighters, mercury thermometers, and rechargeable batteries. Take out mercury-free incandescent light bulbs and fluorescent lamps as landfill waste. Use all of the fluid in disposable lighters before taking out. (If you have not used all of the fluid, bring the lighter(s) directly to the incinerator.) If you cannot remove the rechargeable batteries from a small household appliance, take the item out for collection as is, as a small household appliance.
How to Dispose	<ol style="list-style-type: none"> Without wrapping or covering, place fluorescent tubes and mercury thermometers directly into the containers distributed to trash collection points for the purpose. Isolate dry cell batteries and rechargeable batteries with electrical tape or a similar product before placing them in the provided 18 liter drum. Place disposable lighters directly into the container for fluorescent tubes as is. Put broken fluorescent tubes into a clear bag before placing them in the container. If you have a broken mercury thermometer, put both thermometer and mercury into a sealed container before placing them into the collection container. <p>* A PET plastic bottle may be used as the sealed container, so long as it is labeled as containing a broken thermometer and mercury ("割れ体温計、水銀あり"). * If your mercury thermometer breaks indoors, make sure to ventilate the room while you clear up the mercury. * As mercury is an "environmental pollutant," please do not take it out as "burnable trash" or "non-burnable trash." * Isolate rechargeable and other batteries taken from equipment (by covering their terminals with electrical tape or a similar product) and ensure that they will not be exposed before taking them out for collection.</p>

Topics Fluorescent tubes, dry cell batteries, and rechargeable batteries are disassembled and sorted by a specialist and all their components recycled.

5 Recyclables 《Twice a month》

(1) Recycling Metals Recycling (all components are reborn as new products)

<p>How to Sort</p> <p>① Anything made of metal and plastic that consists more than half of metal should be disposed as a recyclable. * Does not include small household electrical appliances (plug-in and battery operated items are classed as small household appliances)</p> <p>② Vinyl coated steel products, such as laundry poles, should be shortened to below 2m.</p> <p>③ Remove the fabric or vinyl portion from umbrellas and dispose the frame as recyclables (metals). The handles need not be removed.</p>	
<p>How to Dispose</p> <p>① Place empty cans in the empty can collection box. There is a separate collection box for small metal items.</p> <p>② Remove lids from large lidded cans before placing them in the box. Where possible, keep small nails, rivets, and similar items together when placing them in their box.</p> <p>③ Make sure that aerosols are completely empty. If they are not completely empty, bring them directly to the incinerator.</p> <p>④ Make sure that all kerosene has been emptied from the main base and backup tank(s) of kerosene heaters and similar items before disposing.</p> <p>⑤ Empty cans for foods, rinse thoroughly, and dispose.</p>	

(2) Reuse and Recycling of Bottles Reuse, Recycle

<p>How to Sort</p> <p>* Bottles for beverages, food products, cosmetics, oral medicine, and pills belong to this category.</p> <p>① Take out sheet glass and cloudy bottles (particularly cosmetics bottles) as "non-burnable trash (landfill trash)."</p> <p>② Take out empty ceramic beverage containers as "landfill trash."</p> <p>③ Remove plastic caps and dispose as "plastic containers and packaging".</p> <p>④ Labels and plastic rings at the top of bottles do not need to be removed.</p> <p>⑤ Items not collected: Bottles for pesticides, herbicides, etc., should be returned to the retailer where purchased.</p>	<p>Cosmetic bottles (Non-cloudy bottles are recyclables)</p> <p>One-way bottles ("One-way bottles" refers to the clear, brown, and all other colors of glass bottle that are collected, finely crushed, and reused as the raw material for glass products.)</p>
<p>How to Dispose</p> <p>① Sort bottles by color into three groups (transparent with no color, brown, others) and lay flat in the empty bottle collection bin.</p> <p>② Broken bottles should be placed in bags (transparent bags if possible)</p> <p>③ Bottles should be emptied and rinsed thoroughly.</p> <p>④ Take out baby bottles and Pyrex glassware as landfill trash. * Pyrex glass is often used for heat-resistant glass containers, including, for example, glass measuring cups.</p>	

(3) Waste Paper Recycle

Topics Each component of newspaper is recycled, including into newspaper.

<p>How to Sort</p> <p>① Waste paper is separated into six categories: newspaper, magazines, miscellaneous papers, cardboard, milk and other cartons, and shredded paper.</p>					
<p>How to Dispose</p> <p>① Bundle by tying up the stack both horizontally and vertically using paper strings.</p> <p>② Pack miscellaneous papers into a bag or similar container at home. On collection day, place only the papers into the collection container.</p> <p>③ Make sure milk and other cartons are completely empty, rinse, flatten as much as possible, and tie into a bundle before taking out.</p> <p>④ Remove duct tape and packing tape from cardboard and other items and take the tape out as burnable trash.</p>					
Newspaper	Magazines	Miscellaneous papers	Cardboard	Shredded paper	Paper cartons for beverage
<p>* Newspaper insert flyers/ads should be bundled together with newspaper.</p>	<p>* Paper boxes, wrapping paper, catalogs, copy paper, etc. can be bundled together.</p>				<p>* Rinse with water, cut open, dry, and bundle. * Cartons with coating inside are accepted.</p>

(4) Fabrics and Down Reuse, Recycle

Topics Secondhand clothing, rags, reclaimed wool (car insulation, sound absorbing materials for stereos, work gloves)

Categories	Items to be disposed as fabrics	Items to be disposed as combustible garbage or shreddable waste.
Clothing	Suits, sweat suits, neckties, socks, pinafores, underpants and other underwear, sweaters, kimonos, obis, yukatas, swimsuits, and more	Clothing stained with paint, oil, etc., torn clothing, pantyhose, yarn, ripped underwear, socks with holes, etc. are combustible garbage.
Cloth	Towels, sheets, kitchen mats, small doormats (no larger than 70cm x 100cm), handkerchiefs, scarves, mufflers	Rugs and carpets are shreddable waste. Strips of cloth (cloth scraps) and wiping cloths are combustible garbage.
Bags	Items made of cloth, nylon, vinyl, synthetic leather, and leather. (items that non-breakable under pressure)	Backpacks, suitcases, travel bags (with wheels), and golf bags are shreddable trash (items that break under pressure)
Curtains, Blankets	Curtains, blankets, cotton blankets, futon covers, pillowcases, sheets, winter sheets, down quilts	Items with cotton lining, such as futons, are shreddable waste. Torn curtains and dirty blankets are shreddable waste.
How to Dispose	Place in a plastic bag when placing out for pickup. * Wet fabrics cannot be reused. Do not place out for pickup when raining. * Where possible, take out to the trash collection point and place the bag with its opening on the bottom.	

Topics Please dispose of items not listed above as "burnable trash" or "shreddable trash" based on their size and classification as non-reusable according to the following, non-exhaustive, criteria: ① items dirtied with mud, oil, paint, or other soiling to the extent that they cannot be washed, ② mattresses, comforters, floor cushions, pillows, and similar items, ③ lavatory seat covers, doormats, and bathmats, ④ slippers and dustcloths, ⑤ blankets and towels used for pets, ⑥ kotatsu underlays and heated blankets, ⑦ plastic raincoats and umbrellas, and ⑧ company uniforms and work clothes (limited to personal items that could not be disposed of by the company).

Recycling "Miscellaneous Paper"

"Miscellaneous paper" is a precious resource."

Help recycle "Miscellaneous paper".

Nagaizumi town collects "miscellaneous paper" as recyclables as part of its efforts to reduce combustible garbage and to promote the effective utilization of resources. Currently, paper waste accounts for approximately 60% of combustible waste produced in our town. If we can avoid the incineration of "miscellaneous paper" and recycle them as paper resources, we will be able to greatly reduce the total amount of incinerated waste. This will lead to cutting down on incineration costs, prolonging the longevity of incineration facilities, as well as contribute to stopping global warming by reducing the emission of CO2. Please join our efforts by disposing of "miscellaneous paper" as recyclables.

Papers that can be disposed as miscellaneous paper Paper packaging and paper products with a mark.

Envelopes Paper boxes, candy boxes Calendars Wrapping paper Toilet paper tubes Paper bags
Collapse Remove metal parts

Pamphlets Notebooks Copy paper Tissue boxes Plasticwrap and vacuum-packed food boxes Waterproofed paper products
Remove metal parts Paper cups/dishes, Cup noodle cups

*Extremely dirty paper and vinyl-coated paper cannot be disposed as "miscellaneous paper" → remove and dispose as combustible garbage.

Not miscellaneous paper → Dispose as combustible garbage.

Metal-embossed paper Back carbon paper, non-carbon paper Thermal paper Photo paper
Copying slips for home delivery services, etc. Fax paper, receipts, etc. *Excluding matte paper

Wet paper, paper soiled with oil Press bonded postcards Synthetic paper
Used tissue paper Confidential postcards Waterproof posters, maps, etc.

*Composite material paper such as aluminum embossed paper, heat sensitive foamed paper, etc. cannot be disposed as "miscellaneous paper".
*Do not dispose adhesive tapes, metal parts of files, metal clips, stickers, etc. with miscellaneous paper.

How to Dispose

Bundle by tying up the stack both horizontally and vertically using paper strings. Paper boxes (tissue boxes, candy boxes, etc.), wrapping paper, paper bags, notebooks, pamphlets, copy paper, calendars, etc. may be bundled together with magazines)

"Miscellaneous paper" that cannot be bundled together with magazines should be stored in a paper bag with paper handles. Place out when bag is full, tying the top closed or vertically tying up the entire bag using paper strings.

Not all papers can be disposed as "miscellaneous paper".

6 Recycling Personal Computers

While the recycling of computers was made mandatory by the Law for the Promotion of Effective Utilization of Resources, computers fall under the Act on Promotion of Recycling of Small Waste Electrical and Electronic Equipment, so are to be brought directly to the incinerator, where the municipality processes them. * We promote the appropriate and effective utilization of resources.

(1) Waste Computer Processing Based on the Law for the Promotion of Effective Utilization of Resources

PC リサイクル

←Look for the PC Recycling mark

Manufacturers will collect and recycle products with this mark free of any additional cost. A collection and recycling fee must be paid when disposing products without this mark.

◆How can I have my old PC collected?

- ①Apply directly to your PC's manufacturer. Refer to the manufacturer's website for information on their the collection service, such as the URL, phone number, business hours of the collection desk
- ②For the disposal of computers that cannot be collected by its manufacturer or for homebuilt computers, Contact the PC3R Promotion Association.
☎03 (5282) 7685 FAX 03-3233-6091 Website <http://www.pc3r.jp/>

◆How much do I have to pay to dispose a PC without a PC Recycling mark?

Fees for collection and recycling are determined by each manufacturer. Please confirm with your PC manufacturer's inquiry desk (website etc.) for details.

◆The retailer from which the PC was purchased, second-hand PC retailers, recycling shops, etc. may also be able to assist you.

Devices subject to PC Recycling

- Desktop computers (including stand-alone system units)
- Laptop computers
- LCD monitors
- CRT monitors

*Printers are not included.

(2) Waste Computer Processing Based on the Act on Promotion of Recycling of Small Waste Electrical and Electronic Equipment

Waste computers are not collected at municipal trash collection points. After clearing personal information from your waste computer, please bring it directly to the municipal waste incinerator. Equipment accepted by the municipality includes laptop computers, the main bodies of desktop computers, displays and other peripherals, tablet computers, and educational materials. However, items used in offices, stores, factories, and similar situations are classed as industrial waste. Please address inquiries regarding industrial waste disposal within Nagaizumi to Seki Transys Corporation.

(3) Cellphones

After deleting any personal information, please dispose of cellphones as "non-burnable trash (small household appliances)."

Recycling Electric Home Appliances

Appliances Subject TVs, air conditioners, refrigerators, freezers, washing machines, clothes dryers

The Six Main Electric Home Appliances cannot be disposed at waste collection points.

The Home Appliance Recycling Act mandates the recycling of the six main electric home appliances, which are TVs, air conditioners, refrigerators, freezers, washing machines, and clothes dryers. Recycling fees to be paid by the consumer for their disposal are follows.

Fees to be paid by the consumer (before tax)					
Category	TVs (CRT, LCD, Plasma)	Air Conditioners (indoor and outdoor equipments as a set)	Refrigerators, freezers	Washing machines	Clothes dryers
① Recycling fees	2,700yen (1,700yen for 15-inch and below)	1,500yen	4,600yen (3,600yen for 170 ℓ and below)	2,400yen	2,400yen
② Collection fees	Confirm transportation costs that may be incurred with your retailer, etc.				

* The above recycling fees may vary by manufacturer.

* Contact for manufacturers' recycling fees: **Electric Home Appliance Recycling Ticket Center** TEL: 0120-319-640

* Above fees are subject to change.

How to Dispose

(1) Trade-in when purchasing a replacement.

The retailer selling a qualifying new product is obliged to collect the old product the new one is replacing. You can have the old product collected upon paying the above fee. (Contact the retailer regarding transportation fees that apply to the collection)

(2) Collection by the retailer.

When you wish to dispose one of the six appliances without purchasing a replacement, the retailer from which the appliance was purchased is obliged to collect the product. You can have the product collected upon paying the above fee. (Contact the retailer regarding transportation fees that apply to the collection)

(3) Directly drop off the unneeded product at a collection center designated by the manufacturer.

You can drop off a used appliance at the following **designated collection center**.

Designated collection center **Seki Transys Corporation**
515-1 Nameri, Nagaizumi Town TEL 988-6868 FAX 988-6869

How to Dispose

(4) Consign collection to a certified general waste disposal contractor.

When you are unable to deliver the appliance to the collection center noted in (3), you can consign the delivery to a certified contractor. In this case, you must pay both the ① recycling fee and the ② transportation cost for the collection. Contact the incineration plant (Sanitation Office) for details. TEL 986-8393

Recycling Motorcycles

Motorcycles collected through the Motorcycle Recycling System will be recycled free of charge. First, confirm whether your motorcycle qualifies for the Motorcycle Recycling System.

Motorcycle Recycling Call Center
☎ 03-3598-8075
<http://www.jarc.or.jp/motorcycle/>

Motorcycle Recycling System

Designated motorcycle collection center in Nagaizumi Town is **Seki Transys** (see p17).

Please do not use collection contractors who are "unlicensed" for waste management

Per the Home Appliance Recycling Law, if a retailer has received waste household appliances from individuals who wish to dispose of them and has passed them on to an "unlicensed" waste collection contractor, this is considered a violation of the delivery obligations stipulated under the Home Appliance Recycling Law.

"Unlicensed" waste collection contractors may do any of the following.

Advertise throughout the town using loudspeakers

Collect from vacant lots

Distribute leaflets

Advertise on the internet
